## GYMNASTICS

Gymnastics is one of the greatest activities available to children and also one of the most physically and mentally challenging. Gymnastics develops strength, balance, coordination, flexibility and confidence. Our non-competitive approach to teaching provides a warm, comfortable, and friendly atmosphere for learning. Early non-competitive activities allow children to develop positive self-image as they experience success at their own level and progress at their own rate. The preschool level concentrates on motor skill development and serves as an introduction to gymnastic exercises and equipment. Beginners work on floor exercises, balance beam, uneven bars and basic vaulting. The advanced students will also follow these routines, but on a more challenging level. The listed ages for each level serve only as a guideline, as students may be moved to a more appropriate level to match their ability. Classes will have limited registration.
